PROFESSIONAL SUMMARY

Highly analytical and solution-oriented IT Support Engineer with hands-on experience in 1st and 2nd level technical support, combined with a strong passion for Linux systems administration, automation, and cloud infrastructure (AWS / GCP). As a dedicated self-learner, I excel at quickly mastering new technological ecosystems and efficiently managing, scripting, and optimizing complex legacy infrastructures. Fluent in four languages with a proven track record in direct client communication and SLA-driven ticket resolution.

WORK EXPERIENCE

IT Support Engineer (1st & 2nd Level) | Spectos GmbH

10/2025 — Present

Dresden, Germany (Remote / Hybrid)

- Ensure seamless IT operations across demanding 1st and 2nd level support workflows in strict compliance with Service Level Agreements (SLAs).
- Perform structured troubleshooting and deep-dive technical analysis of system, network, and software anomalies.
- Execute API testing and data validation to verify complex system integrations and communication middleware.
- Administer and query relational databases (MySQL and PostgreSQL) to resolve backend issues and data inconsistencies.

Cloud Automation & Open Source Contributor | GitHub Workspace

02/2026 — Present

Nuremberg, Germany

- Develop modular automation playbooks using **Ansible** to dynamically configure local and cloud-based engineering environments.
- Design and deploy automated CI/CD pipelines using **GitHub Actions** for automated CV rendering and portfolio deployment via SvelteKit, MkDocs, and RenderCV frameworks.
- Write custom Python scripts for infrastructure monitoring and data manipulation (e.g., integrating Gmail API and text parsing via Regular Expressions).

TECHNICAL SKILLS

Support & Operations

1st & 2nd Level Support

Ticket Management

SLA Monitoring

Root Cause Analysis

Postman / API Testing

Systems & Cloud

Linux (Ubuntu/Debian)

AWS (VPC, EC2, S3, IAM)

Google Cloud Platform (GCP)

Docker Core

Automation & Code

Ansible Playbooks

Python 3

Bash Scripting

Git / GitHub CI/CD

Regex

Web & Databases

MySQL

PostgreSQL

REST APIs

YAML / JSON

MkDocs

EDUCATION & CERTIFICATIONS

Preparation: AWS Certified Solutions Architect – Associate

Self-Study — Active

Focus: Cloud architecture, high-availability system design, VPC layout, and IAM security structures.

Advanced Training: Linux & Systems Administration

Continuous

Focus: Configuration management with Ansible, advanced Bash scripting, and Linux permission schemas.
